

## Lab-23 Finding Bad Characters

---

Please use the two videos found below which cover how to find bad characters and eliminate them.

[17-Finding Badchars Manually](#)

[18-Finding Badchars using mona](#)

The videos explain how to manually find the bad characters that might truncate our shellcode. Please watch the videos and make sure you repeat them and then submit your walkthrough either as a video or a document.

**Note:** The executable Test.exe can be downloaded from [here](#).
